

SORTING PROTOCOL

The purpose of this protocol is to regulate and standardise the criteria for assigning athlete classifications.

Once athletes have completed and obtained an official classification, they may compete in their category in accredited Championships WAKO.

Competitors will thus be classified to participate on equal terms in different championships.

All documentation will be sent to the Parakickboxing Inclusive Department, which will be analyzed by the relevant classifying team to assign the competitor a sport class.

The classifications may be revised if the sorter team or the athlete deems it necessary.

For all of the above and to carry out the classification, all the following documentation must be sent:

1. Completed classification document
2. Disability certificate
3. Medical assessment of their disability
4. Valid license
5. Send a short video practicing the test in which you want to compete; in this video, the athlete and their coach should be seen in full body performing the work.
